THE UPDATE

Christ-Centered | Bible-Based | Ministry-Focused

Upcoming Community Events

SALT is hosting a variety of community events this week. Students are encouraged to join us as your schedules permit and as you would like!

- **Community Chapel Service Viewing** – Tuesday, Dec. 1st at 10:40 am
- **Time of Prayer with Dr. Hogan** – Tuesday, Dec. 1st from 5:15-5:35 pm
- **Time of Prayer with Dr. Hogan** – Thursday, Dec. 3rd from 5:15-5:35 pm

Pic of the Week

Its beginning to look a lot like Christmas!

Chapel

Reverend Dr. Cameron Jorgenson, Associate Professor of Christian Theology & Ethics, will be our chapel speaker this week. Each week, the chapel service will be emailed to students on Tuesday mornings.

There will also be an opportunity to gather together virtually to watch the recording of the chapel service at the usual chapel time of 10:40 am. A link to this session will also be included in the chapel service email.

CAMPBELL UNIVERSITY

Divinity School

DIVI 6149: Using Technology in Ministry Course Description

Please see the third page of the Update for a course description of DIVI 6149: Using Technology in Ministry. If you are interested in taking this course during the Spring 2021 semester, please read this information to learn more!

Prayer Requests & Praise Reports

Please pray for **Katrina Tatum** and her family as they grieve the loss of her uncle to COVID-19.

Please send your Prayer Requests & Praise Reports to Abram Buckner at abuckner@campbell.edu or to Amber Johnson-Carter at ahjohnson@campbell.edu.

Please Remember to wear your mask.

Pulpit Supply

Churches often reach out to the Divinity School looking for individuals who can assist with pulpit supply. We work to connect students with these opportunities as they come up. If you would be interested in learning about pulpit supply opportunities (in-person and virtual) as they arise, please email Amber Johnson-Carter at ahjohnson@campbell.edu.

Divinity School Job Board

If you are looking for a ministry opportunity in a church, don't forget to check out the job board on the Divinity website. Click HERE to view the job board. Contact Tere Murphy at murphyj@campbell.edu for more information.

DIVI6149: Using Technology in Ministry

This class will introduce how to work with video - how to capture it, combine it, edit it, add special effects, stream it, etc. - with a focus on the needs of ministry contexts. As an introduction, this class will not presume any particular level of prior experience in working with video; beginners are welcome, as are those with some basic experience who want to expand their skills. However, persons who already have extensive experience in working with video will likely not find the class particularly helpful. Depending on the needs of class members and the time available, we may also do some introduction to working with images and graphics (separately or incorporated into video).

Schedule and Format: The format of the class is a one-week intensive, starting on Sunday evening (January 3) and running through Friday evening (January 8). Sunday evening will consist of a 2 hour Zoom meeting, from 6:00 - 8:00 pm, to introduce the class and make sure everyone has been able to load the needed software (see below). Monday through Friday the schedule will be as follows:

9:00 - 10:00 am	Zoom meeting to discuss the tasks and projects for the day
10:00 - 12:00 am	Students will review instructional materials (delivered on-line), trying out the ideas and tasks presented. The instructor will be available as needed to answer questions. Discussion board will be open for students to consult with one another.
by 1:00 pm	Students will complete a brief quiz on the material for the day; the quiz can be taken multiple times.
1:00 - 5:00 pm	Students will work on a project for the day. The instructor will be available as needed to answer questions. Discussion board will be open for students to consult with one another.
6:00 - 8:00 pm	Students will share their daily projects with one another. The instructor and other students will offer feedback, suggestions, hints, etc.

Grading: This course is offered on a pass/fail basis.

Requirements: Each student must have full access to a computer, including the ability to install software, throughout the duration of the course. The computer must have sufficient performance and storage to work with videos; recommended minimum is 4GB of RAM (8GB or more is better) and 50GB of storage. The computer must have a webcam and the ability to connect to high-speed internet during the times that the class will meet via Zoom. The computer must also have a means for accessing video files from a camera (see below), either wirelessly or via a USB or other appropriate cable.

Each student must have a means for generating video. At the minimum, students must have a webcam on their computer. Ideally, students will also have the ability to record video via a cell phone, digital camera, or video camera. Students must be able to transfer the recorded video to their computers; we will discuss how to do this if needed.

Students will not need to purchase any software; however, they will be required to download and install free/open-source software as directed. As noted above, students do not need any prior experience in working with video; however, students do need a basic level of proficiency in using computers, e.g., the ability to download and install software.
